Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-2,6,9-10 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rybicki (U.S. patent # 5,483,182) in combination with Lenk (U.S. Patent # 5,233,287).

Rybicki discloses the claimed invention an on-chip DC-to-DC converter (figure 2 and 3), an external inductor (figure 2, item 14), an output capacitance (figure 2, item 20); the regulation module provides current limiting of the output (figure 2, item signal 50), a comparator (figure 2, item 42). However Rybicki does not disclose the utilization technique for a limiting duty cycle of the output to the zero loading. Lenk disclose the utilization of the similar technique for a limiting duty cycle of the output to the zero loading (claim 2). It would have been obvious one having an ordinary skill in the art at the time the invention was made to modify Rybicki DC-DC converter by utilizing the technique taught by Lenk for the purpose of increasing efficiency and reliability.

Allowable Subject Matter

3. Claims 3-5,7-811-13 and 15-16 are and objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
